REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

None of the four references used in rejection in the first Office action teach a temporary storage connected to the first conveyance path, via the first conveyance path to the first paper storage for payment, and wherein the temporary storage works with a paper delivery section to discharge the accumulated papers in a block. All of the temporary storage sections, of the prior art used in rejection, take in and feed out papers one at a time.

The recitation of this capability (discharging in a block) of the temporary storage's paper delivery section distinguishes the claimed device from other devices which do not utilize the temporary storage for movement of the completed stack to the outside of the machine or to any other place where they should be received as a block.

US 6,607,081 (newly cited, and in conjunction with parent applications of it which also have been patented, and which have earlier filing dates corresponding to art usable under 35 U.S.C. 102(b)) utilizes a temporary storage in a way that can deliver its papers in a block, but the first, second, and third conveyance paths and first and second paper storing sections are not connected as depicted in the independent claims of the instant application.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
